6th CCollege Information System

The main objective of our product is to maintain information about students, employees and other activities like attendance, student results, fee payment and salary payment etc. The information is stored for decision making in the future for a business process within an organization.

The system will be used by 3 types of users
Admins, Lecturers and Students.

* Admins :

These are the people who play important role in modifications of the subjects, uploads results, modification of subjects and many other. They are helpful in managing the websites, UI and databases of the students, employees.

* Lecturers:

These are the people who create classes for their respective department and updates in the classroom link. So that students will join through that link to attend online classes. They even maintain the attendance database of the students for future reasons.
