Student Information System

ERP System for colleges to manage their daily activities which includes the management of Employees, Students, Books and Library Records, parent details, Assignments, Admission Process, Results and reports, exams, events, attendance, timetable, fees and other reports.

- The system will be used by four people - Admin, Teacher, Librarian, Student.
- Admin can login using valid credentials and perform various tasks such as adding a Teacher, a Student or Librarian and also can view them.
- Admin can also add Time Table and Event details. System allows admin to view book request received from Librarian.
- Teacher can login and perform various tasks such as adding assignment, marking attendance, uploading result and viewing event.
- Librarian can login and perform tasks such as adding single or multiple books, viewing adding books, requesting a book, issuing books to students, returning issued books, students and

viewing events.

- Students can access the system by providing valid credentials and access modules such as viewing their own profile, viewing books, viewing time-table, assignments, results, attendance and event.
- Super admin is the root node who adds the colleges into the system with the valid details. They can view/delete a college from the system.
