Graphics Editor

→ The graphics editor software is an interactive application that allows the user to create, edit, layout, save and print arbitrary graphs. ①

→ These software are usually managed and used by
C/S consumers, administrators and Developer team.

* Consumers

These are typically the users who usually use software for personal edits and frames and can be continued to use for professional purpose with valid copyrights. They are not have access to overwrite features but can only change feature values and others.

* Administrators

These people are usually helpful for managing the users accounts and their status of usage and payment receipts (if premium used). They have access to modify user data with certain authentication steps.

* Developer teams

These people are responsible for maintaining and regular updates of the software for enhanced user experience and easy move of the process. They are in group and have access to every bit of code and can use for feedback information to get

more insights about the features to be improved and modified.
